FLEET

/ HELLO. WE'RE EO CHARGING.

Designed and manufactured in the UK, at EO Charging we build smart energy technologies. Electric Vehicle charging stations designed for homes, workplaces and destinations. Plus eoHUB, our revolutionary smart energy device - which puts up to 30 chargers online, unlocking EO's software capabilities and in the near future - solar, battery storage, smart-grid and smart-home integration.

/ HOW EO CAN BENEFIT YOUR BUSINESS

Our technology has been designed to address the here and now. But grow as you grow.

What does this mean? Our Genius charging stations are smart-ready and future proof. Start off with a simple and cost-effective charging station and when you are ready, we can retro-fit the eoHUB, which unlocks our software functionality. One eoHUB can control up to 30 Genius chargers and via our software you can monitor energy usage, calculate benefit-in-kind, bill for energy and manage power supply.

/ HOW IT WORKS

Future proof and scalable charging solutions for fleet and workplace

One eoHUB can put up to 30 Genius charging stations online

eoHUB is a mini-computer. It can receive new software features over-the-air

YOUR OFFICE OR
WORKSPACE

eoHUB monitors the power usage of your building in real-time and turns up and down the chargers based on the energy available. We call this Dynamic Load Balancing.

/ INTELLIGENT ENERGY

Aside from being our secret weapon when it comes to cost-effective smart charging, eoHUB is getting smarter. In the near future it will integrate with the smart-grid, solar PV and battery storage; enabling our fleet customers to generate revenue from grid-services and reduce (potentially remove) the requirement for upgrading their power supply.

/ OUR PRODUCTS

Here at EO we like to keep things simple. We essentially have two products, with a number of different options.

1.

2.

1. EO GENIUS

The Genius is our future proof, smart-ready charging station. When connected to eoHUB, EO's software platform (eoCloud) and smartphone app (eoApp) are unlocked. eoHUB is a smart-energy device which can put up to 30 Genius chargers online and in real-time, manage the electricity supply.

2. EO MINI

The eoMini is a small and discrete fast-charger which can give your car approx. 30 miles charge per hour. It's a no-nonsense, cost-effective solution.

FEATURES

- 4 power ratings – 3.6kW / 7.2kW / 11kW / 22kW
- 3 plug types – Type 1 Tethered / Type 2 Tethered / Universal Socket
- 3 year product warranty
- Qualifies for OLEV Electric Vehicle Home Charge Scheme (£500 grant)
- Qualifies for OLEV Workplace Charging Scheme (£300 grant)

/ EO HUB

A mini-computer that gets better with age

eoHUB is a little internet connected box that plugs into a Genius charger and puts it online. One eoHUB can connect up to 30 Genius chargers, making installing multiple smart chargers super cost effective. eoHUB allows you to control your Genius chargers via eoCloud and eoAPP.

- For maximum safety eoHUB monitors a building's power supply and actively manages the load on multiple chargers.
- Coming Soon – Solar PV, Battery Storage and Smart-Grid Integration
- Hard-wire internet connection only for reliability and low-cost ongoing fees

/ EO SOFTWARE

Manage your EO charging stations online

EO SMARTPHONE APP

Control your charger from anywhere in the world. Start, stop and pay-for-charge – all from the palm of your hand.

- Navigate to your nearest available EO
- Pay for charging on-the-go
- View your charging history
- Charge session notifications

EO CLOUD

- Restrict access to specified individuals
- Monitor your employees' electricity consumption
- Set pricing and generate revenue
- Record employees' usage at home and on-the-go

/ EO ACCESSORIES

A few essential EV accessories

STAINLESS STEEL FLOOR MOUNTED CHARGING POST

Have your EO Charger/s mounted on our Stainless Steel Post. You can have one charger on its own or two chargers mounted back-to-back.

CHARGING BAYS & SIGNAGE

Use our branded bays to display the power rating of the charger, helping drivers to park in the right spot.

Installing EV charging signage at your car park is a great way to help visitors navigate their way to your charging bays. It's also a good way to advertise to passers by that you have the facility and can help you drive traffic and generate revenue.

/ OUR STORY

Having previously worked at another UK charge point manufacturer, Charlie was frustrated at the state of the UK's charging infrastructure. So one day back in 2014 he decided enough was enough and quit his job to start EO Charging. The plan was simple – build superior charging equipment, backed up with unbelievable customer service.

You'll see that our vision has evolved a lot since then, however our ethos hasn't changed. EO is a family run business and our factory is still on 'the farm' (Charlie's Grandad's farm). At EO we look after each other like we do our partners and customers. In a fast moving, high-tech world – we keep things simple. We call it Invisible Tech.

EO stands for electricity online and it's our mission to help people become energy independent. Electric car charging is one piece of the jigsaw puzzle.

— Charlie Jardine, EO Founder
