Procedures for approved use of new lithium batteries not listed herein

- 1 GoodWe conditionally provides CAN communication protocol of BMS, upon request.
- 2 Based on the communication protocol provided by GoodWe, the battery supplier is required to firstly test compatibility with GoodWe inverters.
- 3 GoodWe shall further conduct and verify the compatibility test with the new battery to determine the final approval. The list is subject to changes and updates will be published from time to time. Please contact GoodWe for technical consultation on new batteries not on the approved list to verify if any compatibility test is required. Any unauthorized battery connections made without prior authorization from GoodWe will NOT be covered by GoodWe limited warranty.

* Other Terms

- 4 Users are reminded that although GoodWe products ES, EM, BP and SBP series are technically compatible and capable of achieving good results with lead-acid batteries, Lithium-ion batteries with direct communication to the charging device are the preferred battery choice. Use of lead-acid or other similar batteries requires experienced and precise design, installation and maintenance to keep the battery working functionally. Failing to do may lead to battery failure, compatibility issue or other damages to the solar system. Users should first contact GoodWe for technical consultation and obtain official confirmation prior to installing any battery not included in the official published compatibility list, including but not limited to lead-acid battery.
- 5 Unless there is a specific agreement between GoodWe and the battery manufacturer, for all battery packs NOT listed herein but have completed the compatibility test with GoodWe inverters, the installer/system integrator shall be responsible for battery safety, as well as system performance and reliability. GoodWe shall guarantee proper inverter performance under normal working conditions within the standard warranty term and provide limited technical support if applicable. However, GoodWe shall assume no liability on any system malfunction or any incurred loss or damages whatsoever.
- 6 Failing to follow the instructions above or failing to provide correct battery information will render GoodWe's warranty null and void. Goodwe shall NOT be liable for any consequences arising therefrom. Goodwe reserves the right of final interpretation.
